Webinar ~ March 27 at 4:00-5:00 pm
Bring VisionCoders to Your School

## Open to all Bexar County Title I middle schools!

We have a unique opportunity for your school that can greatly benefit your students with a high-quality, social-emotional learning (SEL) and asset-based STEM-Computer Science program – **at no cost to you**.

This **in-school program** offers students who are in at-risk situations to become the next generation of software coders through IDRA's innovative project, **VisionCoders**.

In this course, eighth-grade students create educational games for prekinder and first grade students in their school community.

Learn more about this incredible program and why you will want to launch it at your school during the 2023-24 school year.

Learn more in our no-obligation webinar!
